

ENVIRONMENTAL POLICY

Bremworth is a carpet manufacturer, operating spinning plants in Napier and Wanganui, and a tufting plant in Auckland.

We are committed to operating our plants and facilities in compliance with all applicable environmental regulations, and in a manner that protects the quality of the environment, and the health and safety of our employees, our associates, and the general public.

We are committed to be sustainable and efficient in our processes and products by minimising the generation of waste and passage of pollutants into the environment.

We will prevent pollution wherever practicable and will pursue a policy of continuous improvement in this area that will guide the environmental objectives and targets of our manufacturing operations, the development of new products, and the promotion of environmental awareness with suppliers and customers.

Greg Smith
